## USEFUL INFORMATION

### About Datatag:

#### What is Datatag marking?

Datatag is basically very simple. It makes the insured karts and equipment identifiable to the police in such a way that it is extremely difficult for the thief to overcome and so his risk level becomes unacceptably high. Datatag has made a major impact on reducing theft and has a 100% successful prosecution rate. Datatag is Thatcham Q listed and is a winner of International Frontline Award for security. For more information click [here](#).

#### What does the Datatag Kit include?

**Glass Tag Transponders:** This transponder is roughly the size of a grain of rice and can be easily installed. It contains a unique code number which is permanently programmed into its integrated circuit. The number cannot be altered or deleted.

**Ultra Destruct Visible ID Labels:** These labels are laser engraved and are impossible to remove in one piece.

**Warning Decal:** These specially designed Datatag resin domed decals warn off any potential thieves and are both attractive and impossible to remove without damage.

**Datadots®** A superior microdot identification system developed for ease of use. The Datadots can be applied to any surface, thus making it virtually impossible for the criminals to locate and remove them all.

**Tamper Evident Warning and Re-Registration Label:** Specially designed decals warn off any potential thieves and are both attractive and impossible to remove without damage.

**Scanners:** Police forces and official bodies are able to check property using hand held scanners. In the UK alone Datatag have supplied over 3000 scanners free of charge to most police forces. These scanners are also being provided to police forces over Europe.

**Database:** The Datatag customer database is one of the most sophisticated secure databases ever built and is available 24 hours a day, 7 days a week.

**Obtaining Datatag kit?** Contact Datatag on **Tel: 08450 700 440 or 01784 778 310**. Website: [www.datatag.co.uk/motorsport.php](http://www.datatag.co.uk/motorsport.php) **Address:** Datatag ID Ltd, Marine House, Thorpe Lea Road, Egham, Surrey, TW20 8BF.

**How much does the Motorsport DatatagKit Cost?:** £59.99 – but this is a “one off” cost – not annual.

**How do I fit the Datatag identification System?** This is very straight forward. Instructions are provided with the kits that will be sent to you.

#### What happens if I do not Datatag my insured equipment?

If this is not done within 21 days theft cover under your policy will be automatically excluded. If you suffer a theft you then run the risk of not being insured.

## Trailer Security

By taking every possible precaution to protect your trailer, all will benefit by helping insurers to keep your premiums down, plus do you really want the hassle of losing your trailer and anything in it?.

Trailer theft is a big problem and it's getting worse! To a thief, an unsecured trailer is simply money on wheels that is just asking to be stolen.

There are steps you can take that will go some way to deter an opportunist thief since the vast majority of them are looking for an easy heist. If presented with an effective theft deterrent the thief will invariably move on to easier targets.

The two biggest enemies for a thief are:

- **time** *and*
- **noise**.

Anything you can do to slow a thief down and make them generate noise will improve your chances of keeping your property. Here are some simple steps you can take:

- Park your trailer where it is least visible to people passing by. If it's out of site, it's out of mind.
- Don't park your trailer with the front pointing towards the street/road / escape route.
- Remove one or all of the trailer wheels. Take the lug nuts too. Thieves frequently carry spares with them.
- Use a chain or cable to secure your trailer to some stationary solid object.

Obviously, you may not want to take the time to remove a wheel every time you park your trailer so the use of some sort of trailer security device is the answer. When you're on the road with your trailer, using a security device is the only answer. Trailer security devices fall into two basic categories.

- 1) Hitch locks
- 2) Wheel locks

Although hitch locks provide some measure of theft deterrence, thieves can defeat them reasonably easily and with very little noise.

Insurers recommend wheel locks because if thieves cannot move your trailer because one of the wheels is properly secured, it's going to be tough to steal your trailer. Remember....time....noise.

A wheel lock must automatically prevent removal of the wheel on which it is installed. Many wheel locks available today just clamp onto the wheel and are not designed to prevent wheel removal. Those type wheel locks are very easy to defeat.

**Helpful Tip:** Always install the wheel lock on the "driver's side" of your trailer because:

1. If potential thieves back their tow vehicle to your trailer, as they open the driver's door of the tow vehicle they will probably see the wheel lock and be put off.
  2. Installing your wheel lock on the driver's side of the trailer helps remind you to remove the wheel lock before using your trailer.
- Remember....time....noise.
  - Secure it and keep it.
  - Ignore it and lose it.
  - Don't wait until it's too late.
